# AeroGarden Maintenance

## See The Included Instruction Guide for Details

- **Adding Water:** The water **light will flash** when the water level drops below 50%. Add more water to the fill line.
- **Adding Plant Food:** Approximately **every two weeks**. A **flashing light will remind you**. Review the instruction guide for details. Always add the correct amount of plant food according to the instructions on the bottle.
- **AeroGarden Recommends: Emptying the water bowl and refilling** it with fresh distilled or filtered water and plant food **every two weeks**.
- **Pruning:** Prune tall plants: If you are growing different plant types, prune taller and bushier plants to allow space and light for shorter plants. Don't prune too much: **Don't prune more than 1/3 of a plant at a time**.
- **Cleaning: Clean the entire machine** with warm soapy water every 4-6 weeks. You can add a few drops of bleach to disinfect—if you want. Rinse well and dry before using again.

# Other Hydroponic Systems
